1. ABOUT ACTIVE SOLUTION

- ▶ Our Head Office is located at 1st Floor, Giao Chau Building, 102A Le Hong Phong, Ward 4, Vung tau City, Ba Ria Vung Tau Province, Vietnam and the Representative office at 171 Dinh Bo Linh Street, Ward 26, Binh Thanh District, Ho Chi Minh City with purpose to provide faster and efficient service to our customers in sustainable way.
- ▶ We are specialized in Solution Provider and supply a wide range of products relating to Marine System and Infrastructure Division, Upstream/Downstream, Oil & Gas/ Refinery; Power/ Energy/ LNG; Marine/ Offshore; Chemical/Petrochemical/ Water/ Waste Treatment; Pulp & Paper/ Mining... with purpose to create the greatest value to client and expand client's business.
- ▶ Equipped with a team of efficient and capable workers, responsible and experienced supervisors, we are here to ensure the success of many types of project that will be undertaken in the future.

Active

Where Your Technology Is Innovation

OUR VISION

To become a worldwide leading of Manufacturer & Solution Specialist with the highest standard of competency, integrity & professionalism.

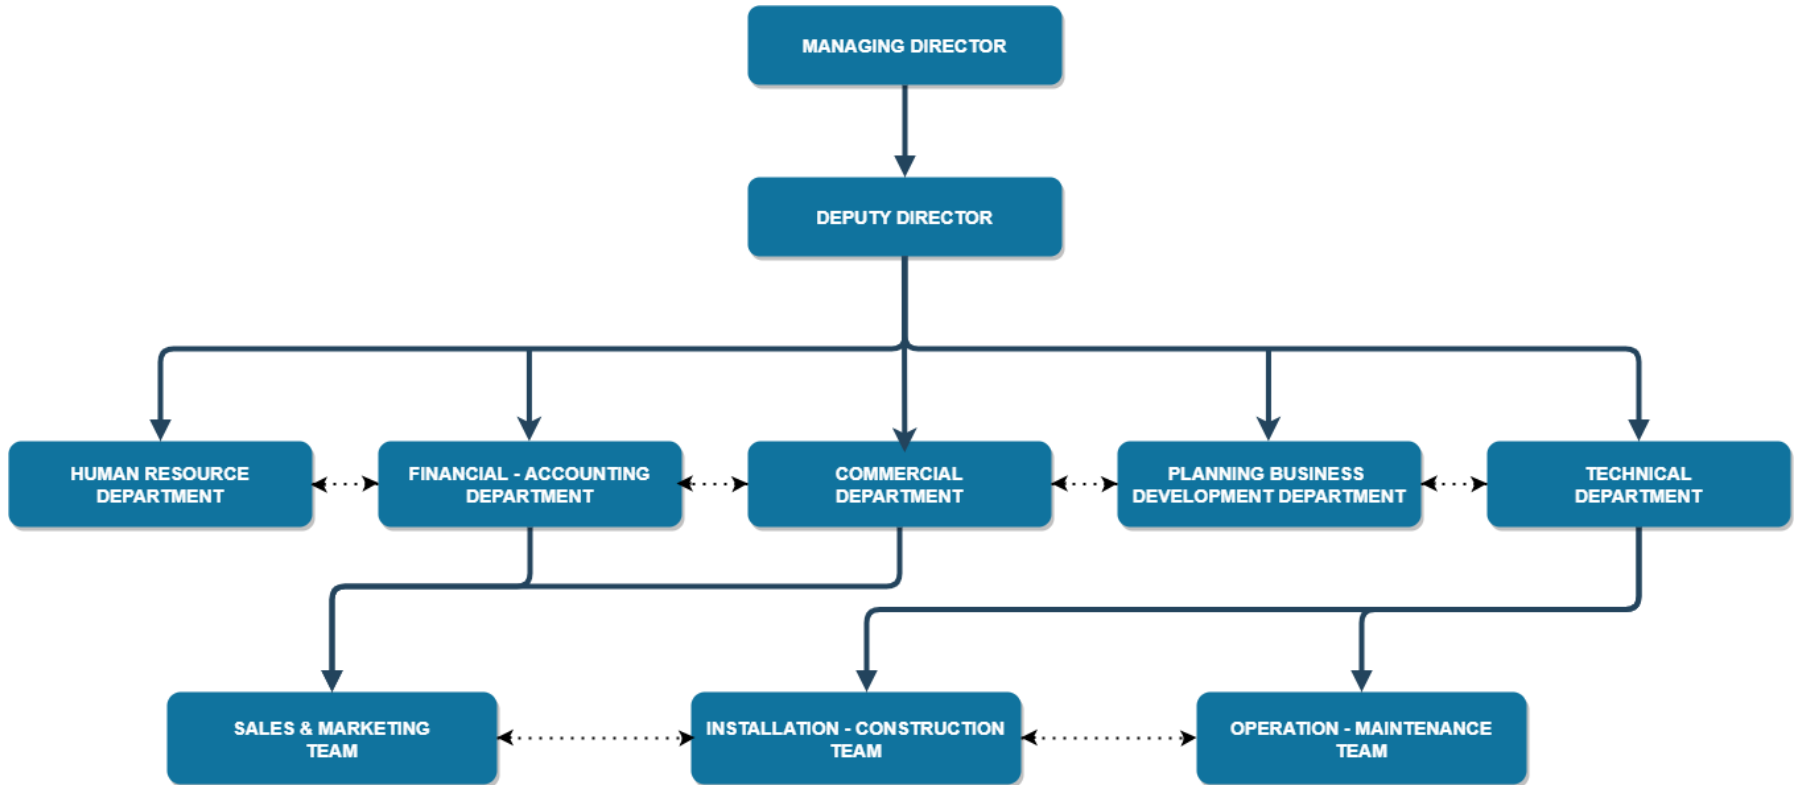

OUR MISSION

As experienced manufacturer & supplier, we pursue for business, safely delivering cost effective, technical services & after sales service efficiency that meet or exceed clients' expectations. We move forwards along with client success.

Where Your Technology Is Innovation

COMPANY ORGANIZATION

Where Your Technology Is Innovation

WHY CHOOSE US?

You will receive:

- Dedicated support throughout the full lifetime of your project and beyond.
- We deliver commercial and technical knowledge and support, and the power to put it into practice through site services and in life maintenance.
- We offer full after-sales service including customized training, spare parts, and tailored maintenance programs, to help you reduce downtime, improve productivity and reduce lifetime cost.

2. CORE PRODUCTS & SERVICES

MARINE SOLUTION

Sales agent of Trelleborg (Sweden) to provide wide range of Marine Enhance Safety Solutions.

We provide:

- ❖ **The latest innovative SmartPort and Automoor, Modern Fenders system (Công nghệ tiên tiến về việc áp dụng phương pháp neo đậu tự động, hệ thống tích hợp công nghệ neo đậu thông minh và hệ thống đệm va hiện đại nhằm nâng cao hiệu quả kinh tế và an toàn cho việc vận hành cảng) offering deploys the latest in marine technology applications to help ports and terminals optimize Port Owner's operations. It's a technology platform that connects port operations, allowing users to analyze asset performance and apply data insights, to improve day-to-day decision making and long-term operational efficiencies .**
- ❖ **End-to-end service and a comprehensive product portfolio** meet and exceed customer needs, enhancing safety and improving efficiency in all marine environments, from conception to completion and beyond.

Where Your Technology Is Innovation

MARINE FENDERS

Where Your Technology Is Innovation

MARINE FENDERS

Trelleborg's Super Cone Fenders (SCN) are the latest generation of 'cell' fenders, with optimal performance and efficiency.

The conical body shape makes the SCN very stable even at large compression angles and provides excellent shear strength. With overload stops the Super Cone marine fender is even more resistant to over-compression.

Where Your Technology Is Innovation

MARINE FENDERS

SCK Cell Fenders have a very long track record and remain popular because of their simplicity, high performance, and strength.

Trelleborg Cell Fenders come in a wide range of standard sizes and are interchangeable with many, older marine cell fender types.

Where Your Technology Is Innovation

MARINE FENDERS

Trelleborg's Arch Fenders are simple and rugged marine fender systems, providing reliable and trouble-free service for a wide variety of berths even under the most severe conditions. The SAN-fender is a traditional rubber-faced unit whilst the SANP-fender can be fitted with either UHMW-PE face pads or connected to a steel panel.

Corner Arch fenders are available in three standard sizes and provide a simple, easily installed solution to prevent berth corners from damage by smaller vessels.

MARINE FENDERS

TRELLEBORG'S FOAM FENDERS

Trelleborg's wear and tear resistant Foam Fenders absorb impacts even in an aggressive environment. Our Foam Fenders share a construction technology centred on a closed cell polyethylene foam core and an outer skin of reinforced polyurethane elastomer. The closed cell foam structure makes punctures a thing of the past. Every cell is separate and so water cannot migrate into the foam. Even after many years of active service, the foam core can be returned to the factory, re-skinned and made ready for a new lease of life. No matter how badly abused, Trelleborg Foam Fenders, will not burst or explode. Damage is rare, but if the worst should happen our foam fenders will still function until repairs are possible.

- + SeaGuard
- + Sea Cushion
- + Donut Fenders

MARINE FENDERS

TRELLEBORG'S FOAM FENDERS

SEAGUARD

- Unsinkable design
- Virtually indestructible
- Fully compliant with US Navy specifications

Where Your Technology Is Innovation

MARINE FENDERS

TRELLEBORG'S FOAM FENDERS

SEA CUSHION

- Low maintenance
- Ultra-tough, unsinkable design
- Low reaction and high energy options

MARINE FENDERS

TRELLEBORG'S FOAM FENDERS

DONUT FENDERS

- Freely rotates around a pile
- Requires minimal maintenance
- Will not mark ship hulls

MARINE FENDERS

TRELLEBORG'S ACCESSORIES

LADDERS

- Corrosion resistant
- Suits many applications
- Can withstand most accidental impacts from smaller vessels

MARINE FENDERS

TRELLEBORG'S ACCESSORIES

FENDER PANELS

- Closed box steel structure
- Blind boss fender connections
- Pressure tested for water tightness

UHMW PE

- Very low friction coefficient
- Excellent abrasion resistance
- UV and ozone resistant

Where Your Technology Is Innovation

MARINE FENDERS

TRELLEBORG'S ACCESSORIES

ANCHORS & SHACKLES

- High holding power
- Available in various sizes
- Available in various steel grades

CHAINS

- Choice of open or stud link chains
- Proof load tested and certified
- Galvanized as standard

Where Your Technology Is Innovation

TRELLEBORG BOLLARD

Marine bollards are a simple and cost-effective way to fulfill mooring requirements and safely secure vessels alongside jetties, berths, wharves, and dolphins in ports and harbors. Trelleborg Marine and Infrastructure provides bollards with a range of design profiles, sizes, and mooring line capacities to suit all mooring applications.

The shape of Trelleborg bollards has been refined with finite element techniques to optimize the geometry and anchor layout. Even at full working load, Trelleborg bollards remain highly stable and provide a safe and secure mooring operation.

TRELLEBORG SMARTPORT

(Hệ thống cảng thông minh - tích hợp công nghệ tiên tiến)

Smarter Marine and Port Operations

Connecting assets – using data to discover insights for customers – delivering value

- Connects port operations – assets at the port / vessel interface
- Allowing operators to analyze performance
- Use data to improve decision making.
- Performance data is captured, transmitted, standardized and stored – allowing seamless analysis.
- Data is presented to relevant stakeholders, across a range of devices.
- Data users are registered through a license server and pay by subscription

Where Your Technology Is Innovation

TRELLEBORG SMARTPORT

(Hệ thống cảng thông minh - tích hợp công nghệ tiên tiến)

Docking and Mooring

Field proven since 1972 and installed in over 500 mooring facilities worldwide, Trelleborg's SmartMoor Quick Release Hooks (QRH) are the foundation for today's modern mooring systems, delivering improved safety and mooring security to clients worldwide.

Available with double or triple hooks in capacities from 60t to 150t, each hook cantilevers from the mounting base and the design ensures the hook cannot impact the deck under any loading configuration.

The SmartMoor QRH is designed to be released by an operator when a mooring line is attached, even under full load.

Where Your Technology Is Innovation

TRELLEBORG SMARTPORT

(Hệ thống cảng thông minh - tích hợp công nghệ tiên tiến)

Docking and Mooring

Trelleborg Marine Systems has developed ReadyMoor Quick Release Hooks, a standardized range of quick release hooks designed for commercial ports and harbors as an alternative to bollards whilst improving safety and efficiency of mooring operation at reduced cost.

This cost-effective series of Quick Release Hooks are available with an average lead time of 12 weeks to assemble, test and ship the product.

Where Your Technology Is Innovation

TRELLEBORG SMARTPORT

AutoMoor

- Safer mooring operations – no mooring lines
- Minimizes vessel motions at berth
- Reduced mooring time increases port throughput and revenue
